

**Verso il Mare**

## Verso il Mare

participatory urban procession | 2018

Conception: Caterina Moroni

With the collaboration and participation of local associations, artists and citizens

"Verso il Mare", "*Towards the Sea*" runs through the city with one great mission: to bring back to the sea a small shell unexpectedly found in the city.

Artists, public and citizens are involved in a collective action, a dramaturgy of public and private spaces, real and imaginary settings, in which physical and mental spaces merge into a personal story to give back to the sea what belongs to it.

This flow towards the sea is full of signs and visions in which other possibilities of life take shape, beings inhabiting the urban space and launching mysterious signals, unexpected landscapes, fragments of stories that unfold, reminding us that the world around us is made of poetry and mystery. And that we need to take care of the small things, of the details.
